Student-Quiz

Manual for Admin

1 Student-Quiz Question Behavior

For the best use of the Student-Quiz Plugin use:

https://github.com/frankkoch/moodle-qbehaviour_studentquiz

The question behavior plugin adds the ability to rate and comment questions. Install this plugin afterwards.

2 Installation

The Student-Quiz plugin depends on the Quiz plugin which is installed as default. Make sure the plugin is installed.

The simplest way to install the Student-Quiz plugin is by going to the Site administration -> Plugins -> Install plugins page.

Important: The zip and the folder name in the zip have to be named "studentquiz".

3 Settings

You can setup the points used by the raking table. For more information about the ranking table look at the User-Manual chapter 2.1.

4 Uninstallation

Important: Make sure you backuped all question. On remove or uninstall the Student-Quiz activity removes all questions on the same context as well.

The plugin can be uninstalled as default. Go to the Site administration -> Plugins -> Plugins overview. Look for Student-Quiz and press Uninstall. If you use Student-Quiz Question Behavior plugin uninstall it first on the same way.

To uninstall the Student-Quiz Behaviour you have to remove all Quiz activities first. Go to the course press "Turn editing on". Delete all Quizzes under the Title "Orphaned activities (section 999)".
